Department of Post honours 2 children for great presence of mind

Mangaluru: Master Srujan, a fifth standard student of Port School, Panambur and Kumari Sharanya, a sixth standard student of the same school were felicitated by the Department of Posts, Mangaluru Division for their great presence of mind

which helped in averting major loss to the post office at Gandhinagar due to a fire mishap in February last year. Both the children who noticed the fire which broke out due to a short circuit in the post office building had immediately alerted the

neighbours. The two children were felicitated by presenting them a letter of appreciation & My Stamp (Stamps with the photo of the children) at the office of the Senior Superintendent of Post Office at Balmatta recently.

Journalists' Village Stay programme at Kombaru on January 31

Mangaluru: DK District Working Journalists Union and Kadaba Taluk Journalists Association will be jointly organising a Journalists' Village Stay (Grama Vastavya) & Awareness Camp at DK ZP Higher Primary School at Kombaru on January 31. The main objective of the event is to interact with locals and to strive to solve their problems with the help of officials & elected representatives. This is the third village stay. The earlier programmes were held at Kutlur of Belthangady & Madappady in Sullia. The programme will be inaugurated

by Rural Development & Panchayatraj Minister K S Eshwarappa. The health camp will be inaugurated by Minister for Ports & Fisheries S Angara while Mangaluru MLA UT Khader will release an informative handout on the Village Stay or Grama Vastavya programme. DC Dr K V Rajendra will launch the Clean and Plastic Free Village Campaign. The function will be presided over by Shivananda Tagadur, President of Karnataka Working Journalists Association. As part of the event there will be a Yoga

show by Yoga guru Dr M Jagadish Shetty, magic show by Rajesh Mali and free medical camp by doctors from AJ Hospital. A blood donation, blood grouping and awareness camp will be organised by Indian Red Cross Society, DK Dist. The above information was provided at a press meet in the presence of DK Dist Journalists' Union President Srinivas Nayak Indaje, General Secretary Ibrahim Adkasthala, Treasurer Pushparaj B N and others.

Maersk Essen reaches Lazaro Cardenas anchorage after container spill

The Neopanamax boxship Maersk Essen, which lost about 750 containers in the North Pacific earlier this month, has reached the port of Lazaro Cardenas, Mexico. The 13,092 TEU vessel arrived at the APM Terminals Lazaro Cardenas berth on late 26 January, the ship's AIS data from VesselsValue shows. It is understood that the vessel may not berth until 30 January whereupon cargo operations can commence. These operations are expected to take several weeks to complete given the complexity and dangers involved, WK Webster, a provider of marine claims management

services. The plan is to inspect the vessel and any damaged cargo onboard and then determine cargo options, Danish shipping major Maersk, the vessel's commercial controller, said in a separate update. As informed, there are several routing scenarios to be decided upon. One of them is that the damaged containers will be offloaded and that the ship will proceed to Los Angeles, California, for normal discharge operations. The intention remains for the Maersk Essen to then call Los Angeles to deliver the cargo that is unaffected, the company noted on

22 January. To remind, the 2010-built Denmark-flagged containership lost containers in rough weather while en route from Xiamen, China, to Los Angeles on 16 January. WK Webster recently shared a drone footage of the Maersk Essen, showing extensive damage following the loss of about 750 containers. However, the company removed the footage after receiving a request from Maersk. Maersk Essen is owned by China's Bank of Communications and deployed in Maersk's TP6 Asia/US West Coast service.

Panama Canal cut 13 million tons of CO2 in 2020

The Panama Canal contributed to a reduction of more than 13 million tons of carbon dioxide equivalent emissions in 2020 by offering a shorter route to ships when compared to the most likely alternative routes. These savings are equivalent to the greenhouse gas emissions of 2.8 million passenger vehicles driven for a year or the carbon sequestered by 217 million tree seedlings grown for 10 years, the canal authority said. As a way of helping inform how the maritime industry adopts initiatives to reduce the carbon footprint and to mark the anniversary of IMO 2020 sulphur reduction implementation, the Panama Canal is launching a CO2 Emissions Dashboard. It will serve to publish monthly data on the CO2 emissions saved by vessels that chose to transit the Panama Canal over the most likely alternative route. As informed, the dashboard will allow users to compare CO2 emissions reductions by route, segment and customer, with data updated each month. The dashboard currently has the overall 2020 data, but will begin reporting the monthly fig-

ures next month. The Panama Canal has long looked for ways to provide greater value to customers beyond serving as a shortcut, with environmental benefits at the forefront of that effort, said Panama Canal Administrator. Our goal is to help customers create more sustainable supply chains. By publishing this data each month, we aim to be more transparent about how the Panama route helps shippers reduce emissions with each transit and track our own growth as a green route for global maritime trade. The data will be informed by the waterway's Emissions Calculator, which allows shippers to measure their greenhouse gas emissions reductions per route, including the amount saved by taking the Panama Canal over other routes. Now using georeferenced data and technology already aboard vessels, the Emissions Calculator takes various factors into consideration – such as vessel type, speed, route, size, capacity, type of fuel, and fuel consumption – to provide the most accurate measurements.
